

Space design of the future open innovation platform

Kiminori Mochizuki (archichi office Inc.)

FS CREATION is the first open innovation platform for life science research in the world, collaborating with academia and domestic major analytical instrument developers in one space. The floor consists of laboratory zones and a shared space, separated by glass walls to remove the barriers between academia and companies and to facilitate mutual collaboration. The interior and furnishings designed for spatial harmony are described.

Nov. 2 (Wed.) 16:00 ~ 17:00
